CONTENTS TO VOLUME 69

Part 1 February 2003

Study of two coupled three-wave interactions with a quadratic non-linearly in the presence of dissipation and frequency mismatch
SHUKLA BASU 1

Solution of the resistive two-fluid wave equations for Alfvénic modes in spherical tokamak plasmas
S. CUPERMAN, C. BRUMA and K. KOMOSHVILI 15

Beat-wave excitation of electron plasma wave by cross-focusing of two intense laser beams
SALEH T. MAHMOUD, H. D. PANDEY and R. P. SHARMA 45

Energy gain by an electron in the fundamental mode of a rectangular waveguide by microwave radiation
HITENDRA K. MALIK 59

Wave modes in a magnetoplasma with anisotropic perturbation pressure
K. SUCHY and C. ALTMAN 69

Errata

Journal of Plasma Physics, Volume 66 Correction to "A general theory of self-similar expansion waves in MHD flows"
M. G. G. T. TAYLOR and P. J. CARGILL 89

BOOK REVIEW 91

Part 2 April 2003

Phase space holes in non-periodic plasmas
ERIC FIJALKOW and LUIGI NOCERA 93

Sawtooth characteristics in ohmically heated HT-7 plasma
LIQUN HU, BAOXIAN WAN, YUEJIANG SHI, SHENGXIA LIU, BILI LIXG and YI XU 109

Excessively bright hydrogen–strontium discharge light source due to energy resonance of strontium with hydrogen
R. L. MILLS, M. NANSTEEL and P. RAY 131

A kinetic and macroscopic description of dust in a plasma, including collision, charging and charge spread effects on diffusion and waves
ALF H. OIEN 159

Part 3 June 2003

Letter to the Editor

Nonlinear coupling between Alfvén and fast magnetosonic waves
G. BRODIN, L. STENFLO and P. K. SHUKLA 183

Evidence of thunder being a chemical explosion of air
PETER GRANEAU, NEAL GRANEAU and GEORGE HATHAWAY 187

Electron acoustic–Langmuir solitons in a two-component electron plasma
J. F. McKENZIE 199

A practical form of Lagrange–Hamilton theory for ideal fluids and plasmas
JONAS LARSSON 211

Uniqueness conditions for Riemann problems of ideal magnetohydrodynamics
M. TORRILHON 253

Part 4 August 2003

Hybrid magnetohydrodynamic–kinetic model of standing shear Alfvén waves
PETER A. DAMIANO, R. D. SYDORA and J. C. SAMSON 277

Nonlinear stationary whistler waves and whistler solitons (oscillitons). Exact solutions
E. DUBININ, K. SAUER and J. F. McKENZIE 305

Collisional transport of electrons in disturbed magnetic field
RYUTARO KANNO 331

Nonlinear stability of axisymmetric ideal magnetohydrodynamic flows
A. H. KHATER, D. K. CALLEBAUT and S. M. MOAWAD 339

Wake potentials in plasmas containing elongated dust rods
M. SALIMULLAH, P. K. SHUKLA and G. E. MORFILL 363

Part 5 October 2003

Stability of the Landau resonance for drift modes in rotating tokamak plasma
E. ASP, V. P. PAVLENKO and S. M. REVENCHUK 371

Microinstabilities excited by energetic ring current protons
S. MOOLLA and R. BHARUTHRAM 383

Degenerate continuous spectra producing localized secular instability – an example in a non-neutral plasma
M. HIROTA, T. TATSUNO and Z. YOSHIDA 397

Single-event high-compression inertial confinement fusion at low temperatures compared with two-step fast ignitor
H. HORA, G. H. MILLEY, F. OSMAN, P. EVANS, P. TOUPS, K. MIMA, M. MURAKAMI, S. NAKAI, K. NISHIHARA, C. YAMANAKA and T. YAMANAKA 413

Determination of minimum magnetic energy states in frozen plasmas
C. A. PAOLA and A. M. PLATZECK 431

New low-frequency waves and negative mass instability in dusty plasmas
D. P. RESENDES, R. BINGHAM, A. GUERREIO and V. N. TSYTOVICH 439

Dielectric conductivity of a bounded plasma and its rate of convergence towards its infinite-geometry value
PASCAL OMNES 449

Part 6 December 2003

Nested toroidal flux surfaces in magnetohydrostatics. Generation via soliton theory
W. K. SCHIEF 465

The floating potential of spherical probes and dust grains. II: Orbital motion theory
R. V. KENNEDY and J. E. ALLEN 485

New model and estimation of the danger of ball lightning
M. L. SHMATOV 507

On parametric instabilities in HF heating of the ionosphere
S. P. KUO 529

Geometry of magnetic field lines approaching a current sheet
MANUEL NÚÑEZ 541

Characteristic behaviour of dust grains in a sheath formed in plasma with negative ions
P. KALITA and G. C. DAS 551
